## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over House, II et al. (4,677,362) in view of Mineck (4,533,306).

House, II et al. discloses (Fig. 10) the invention substantially as claimed including:

- Claims 1 and 10; a clip 20.
- Claims 2-3; a clip can be mounted in two distinct position (Fig. 1-4).
- Claims 4-5, 9 and 11; the mounting positions are on a motor portions (Fig. 1 and 4).
- Claim 6; clip is adapted to suspend the device from a user's belt (see col. 3, lines 32-33).
- Claims 7 and 12-14; a first projection and a second projection (Fig. 2).
- Claim 8; clip is injection molded from plastic and unitary in construction (Fig. 2).

House, II et al. does not show a reciprocating saw. However, Mineck teaches a reciprocating saw 11 for the purpose of cutting studs. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of House, II et al. by providing the reciprocating saw as taught by Mineck in order to obtain device that cuts studs.
